SUMMARY

Full-stack developer with experience shipping and operating production software. CTO at fYN, an AI-powered personal finance product used through WhatsApp, web, and mobile on serverless AWS, Supabase, and LLMs. I own the full lifecycle —architecture, backend, frontend, integrations, security, testing, and deployment— and document what I build. Seeking internships or junior roles in full-stack development, cloud, or applied AI (remote or hybrid).

EXPERIENCE

CTO — fYN · AI-powered personal finance

2026 – Present · Remote

- Led the design and launch of an AI-powered platform across 3 channels (WhatsApp, web, and mobile), running in production on AWS.
- Designed the serverless architecture (API Gateway, arm64 Lambda, EventBridge, S3/CloudFront, Supabase/PostgreSQL) with 10 automations, ~3–4 s responses, and 100+ automated checks.
- Integrated WhatsApp Cloud API, Groq (LLM), and Wompi; implemented JWT auth, webhook signatures, and CORS. Built the Angular frontend and React Native/Expo app.

Freelance Full-Stack Developer

2026 – Present · Remote

- Built a 3D portfolio for Alejandra Mendivelso (Three.js, GSAP, Vite, TypeScript), deployed on Vercel.
- Reduced the 3D route's initial JS from 716 kB to 121 kB (-83%) through code splitting; idle rendering now runs at 0 draw calls. Added a Zod content pipeline, AVIF/WebP images, and Vitest tests.

PROJECTS

ReservaYa — Multi-tenant booking SaaS

2026 · Academic project

- Angular 21 SSR + Material 3 frontend with Keycloak (OIDC), es/en i18n, and 4 roles: client, professional, owner, and admin.
- Hexagonal TypeScript backend with MongoDB, Wompi/PayU, and a WhatsApp webhook; CI with GitHub Actions and Vitest. Deployed on CloudFront + S3 + Lambda.

Voxy — Voice-based English coach (prototype)

2026

Conversational coach with STT, Whisper, TTS, and pronunciation analysis (PCM → 16 kHz WAV, 3 accents); Angular + serverless backend.

winAI — AI financial assistant

2026

React Native/Expo app + serverless Node.js bot; Supabase auth, dashboard, chat, and 12-month category analysis with Groq.

Linux accessibility assistant

2024 · Academic project

XFCE setup assistant with voice commands in Python/Bash, designed for visually impaired users.

TECHNICAL SKILLS

Frontend: Angular (17/21, SSR), React, React Native/Expo, TypeScript, JavaScript, HTML5, CSS3, Tailwind, PrimeNG, Angular Material, GSAP, Three.js.

Backend: Node.js, Express, Python, Java, REST APIs, serverless, hexagonal architecture, JWT/OIDC.

Cloud/DevOps: AWS (Lambda, API Gateway, S3, CloudFront, EventBridge, CloudWatch, DynamoDB), Serverless Framework, Vercel, GitHub Actions, Git, Docker (basic), Linux/Bash.

Data: PostgreSQL, Supabase, MongoDB, Oracle SQL, relational modeling, query optimization.

AI & integrations: Groq/LLMs, prompt engineering, Whisper/STT, TTS, WhatsApp Cloud API, Wompi/PayU, Keycloak.

Delivery: Scrum, PMBOK, PERT/CPM, Jira, Trello, technical documentation.

EDUCATION

Universidad Pedagógica y Tecnológica de Colombia (UPTC)

B.Sc. in Systems and Computer Engineering · 2022 – 2027 (expected) · Sogamoso, Colombia

GPA 4.1/5.0 · last semester 4.5/5.0.

Complementary education

SENA — Environmental Management Technician.
MinTIC — Basic Programming course.

LANGUAGES

Spanish: native **English:** intermediate
